Product highlights

Free internet radio stations

The Internet radio feature keeps you abreast of news and entertainment updates from thousands of online radio stations worldwide. Connect your Streamium to the Internet and listen to your favorite online programs on an audio system, without having to turn on your PC.

Wireless music playback

Free your entire music collection captured in the PC and play it back through your music system with Streamium network music player ! With UPnP connection, the Streamium network music player can access the music stored in your PC and stream it to a music system, so you can enjoy your favorite music in great sound quality.

LivingSound

Philips' patent-pending LivingSound considerably expands the sweet spot so you can enjoy truly immersive music over a wider area. Combining various sound processes, it recovers the richness and spatial details of the soundstage often lost with a compact stereo system. Phase-shifting and driver angling re-creates a concert experience, equalization of various channels brings out the perfect balance and clarity of sound, while S-signal processing further enhances the ambient quality. The effect is sound that is larger than expected and that is extensively and evenly distributed around the room.

FullSound™

What is music without heart and soul? Philips' innovative FullSound technology faithfully restores sonic details to compressed music, dramatically enriching and enhancing it, so you experience truly immersive music – without any distortion.
